# PETCHER SEEDS

**WORKING TOGETHER TO FEED AMERICA**

## WHAT IS SUNN HEMP

Sunn Hemp, a tropical legume, has the reputation of being one of the best soil-building cover crops in the world. It also has the reputation of being one of the best summer forages in the world for goats. Goats thrive on this forage. This plant grows very fast and typically reaches 6 feet in height in 60 days. It also is a legume so

## WHY GOATS THRIVE ON SUNN HEMP

First of all, the leaves of the plant are over 30% Nitrogen. This boost in protein results in phenomenal herd health. At present there are no known toxins in sunn hemp that reduce parasites in goats. However, the fact that the goats will be mostly upward browsing is another dynamic effect on the herd as they will be ingesting few, if no, worm eggs. It is very important to let the sunn hemp achieve at least 32 inches, preferably 40 inches, in height before allowing the goats to graze. This typically will be around 45 days after planting. This allows time for the main stem to become a bit steamy

it replenishes the soil with Nitrogen. Within 60 days it typically replenishes the soil with over 100 pounds of Nitrogen and translocates from the subsoil 10 pounds of Phosphorus and 80 pounds of Potash per acre. It also adds 4 tons of organic matter and suppresses both Root Knot and Reiniform nematodes in the soil.

and then the goats will eat just the leaves. If the stems are mowed below 12 inches the sunn hemp may die instead of producing fast regrowth. If the sunn hemp is too tall, 6 feet or more, the goats may walk the plant down to eat the leaves and this usually kills the plants. So control graising is a must if you only have a small patch of sunn hemp. Allowing the herd to graze for one hour per day is ample. If unable to control graze ever day, allowing the herd to graze at least once every four days will produce dynamic herd health. Seeding rate: 15lb/per acre.

## RDH Strike Gold

Strike Gold is the only known living son of ECR Black Gold. Black Gold's dam was a full sister to Loverboy. His dam is Roho's Vashti. She is a daughter of Roho Grande, a son of ECR P77 and ECR Rusty both offspring of Southwest Cisco

## Spittfire

son of ECR Rusty and Pengo's Summer Breeze (Pengo Hua daughter).

## ECR BLACK GOLD

was the littermate brother to ECR Gloria and his dam was a full sister to Sunboy 117 Loverboy.

## ECR RUSTY

son of Southwest Cisco

# AT PREMIER WE OFFER MORE

CUSTOMER  
SERVICE

LIVE ONLINE  
CHAT

ASK AN  
EXPERT

EDUCATIONAL  
CATALOGS

## First hand experience...

Premier has three farms upon which we raise chickens, ducks, geese, sheep, meat goats and horses. And we've worked hard to find staff with roots in agriculture.

It matters because we field test our products to determine their strengths (and weaknesses) before we offer them to you. Traditional farmstores don't do this. Let our folks help you make an educated buying decision.

## How to contact us:

**Give us a call at  
800-282-6631**

You'll speak with one of our knowledgeable product consultants in Iowa, and not an overseas call center. And we'll support what we sell, long after a product reaches your door.

**Live online chat—  
with a real person!**

When our consultants aren't on the telephone, they are available via our online chat software. It's a great way to get a quick answer to common questions. *(Available during normal office hours.)*

**Ask-an-Expert  
email service**

Premier has partnered with leading veterinarians and small ruminant nutritionists to offer advice on everything from grazing to general sheep care. Visit our website to learn more.

## Educational Catalogs

Our unique educational booklets can be mailed to your door. Inside you'll find hundreds of pages of innovative, field-tested poultry and livestock husbandry equipment. Includes more "how-tos", helpful tips and practical advice than any other source.
